

README

HTTP Server

- Project uses:
 - Java 1.8.0
 - JUnit 4.12
 - Maven 3.3.9
- Creating jar file: `mvn package`
- Starting the server: `java -jar target/httpServer-0.1.jar -p <port-number> -d <directory-name>`
- Defaults:
 - Port: 8080
 - Directory: `"./foo"`
- Possible options:
 - Valid ports: from 1 to 65535
 - Easy to access directories: `"./foo"` and `"./bar"`
- Quitting the server: `CTRL+C`
- Running the tests: `mvn test`
